DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 8/25/08 have been fully considered but they are not persuasive. In reference to applicant's argument that Aoki does not anticipate the invention presented in new claim 39, the subject matter of claim 39 is found to be the same as the previously presented in claim 35 which was rejected under 102(b). The language used in claim 39 is broad and easily anticipated by the teachings of Aoki. There is no mention of specific informational signals such as current signals anywhere in the claims. Therefore, the new added claim 39 will be rejected for the same reasons given in the previous office action with respect to claim 35.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 39 and 36 are rejected under 35 U.S.C. 102(b) as being anticipated by Aoki (US Publication 20020150478), of record.

Claim 39, Aoki describes a method for diagnosis and control of a direct current motor in a fan unit, the method comprises generating a diagnostics signal from a control unit such as means 7 in association with a motor 6 by using a series of sensors such as means 94-96, the information received by the sensors is sent to the ECU 50 which is the main control unit that controls means 7, see figures 4 and 9.

Claim 36, Aoki describes using PWM for supplying current to the motor.

Allowable Subject Matter

4. Claims 1, 3-5, 9-10, 12-16, 18-20, 22-24, 26, 28, 29, 34, and 38 are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2837

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
